EXPERIENCE

Managing Director | Head of Engineering — 10/2024

Pitney Bowes — Bielsko-Biała

- **Focus**: Executive leadership, organizational direction, stakeholder alignment, multi-line strategy
- Spearheaded cross-functional initiatives that enhanced product delivery efficiency and fostered a culture of continuous improvement
- Guided organizational change efforts, partnering with stakeholders at all levels to modernize workflows and technology stacks
- Built and scaled multidisciplinary teams across engineering, QA, and product areas, ensuring operational alignment with long-term business objectives
- Led strategic planning and execution for multiple product lines, balancing technical innovation with customer-focused outcomes

Engineering Services Manager — 2019 - 2024

Pitney Bowes — Bielsko-Biała

- **Focus**: Hands-on delivery leadership, technical process improvement, team scaling and operational excellence
- Led multiple engineering teams focused on delivering internal and external products
- Worked across development, QA, and DevOps to build high-performing teams, modernize legacy systems, and improve software quality and speed
- Increased product delivery speed by 30% through cross-functional collaboration, introducing agile delivery practices, and reducing handover delays
- Reduced engineering team attrition from 18% to under 8% by introducing clear career paths, peer mentoring, and a culture of ownership and trust
- Drove adoption of cloud-native technologies (Azure, Git) in legacy systems, cutting infrastructure costs by 20% and increasing deployment frequency by 3x
- Improved quality metrics by 35% through CI/CD automation, coding standards, and quality-focused development culture
- Launched multiple products/features across international markets (US, France, Germany, Japan), contributing to YoY growth in customer adoption
- Mentored over 10 team members into senior roles and helped establish a sustainable growth culture

Senior Software Development Engineer — 2018 - 10/2019

Pitney Bowes — Bielsko-Biała

- **Focus**: Hands-on software development, code quality, solution delivery for enterprise and government clients
- As a senior developer, I played a key role in delivering robust, scalable solutions for global clients in the federal and enterprise space
- I worked closely with cross-border teams and stakeholders to ensure projects were delivered with speed and quality
- My work emphasized clean code, maintainability, and alignment with industry best practices
- Developed and shipped multiple mission-critical modules for clients in regulated sectors, including the US federal market
- Focused on speed and quality-consistently delivered features on time with <2% defect rate in production
- Promoted adoption of SOLID principles and design patterns, improving maintainability and reducing code duplication by 30%
- Contributed to architecture discussions and design reviews, influencing system structure and technology choices
- Partnered with presales and solution engineers to build early prototypes and proof-of-concepts that helped close high-value client deals
- Improved developer onboarding by creating internal documentation and reusable code templates

I also consent to processing of my personal data for the purposes of any future recruitment processes.

SUMMARY

I'm an engineering leader with over 10 years of experience in software development and leadership. I've worked on large-scale SaaS and cloud platforms for some of the biggest companies in the world, delivering solutions for markets in the US, France, Germany, and Japan. I moved into leadership because I enjoy helping teams do their best work and ensuring technology supports real business needs. One thing I'm proud of is helping close the gap between business teams and software developers, making communication clearer and collaboration smoother. I've led international projects, built strong teams, and reduced staff turnover to single digits by creating a culture based on trust, ownership, and support. I care about writing clean, reliable code, designing systems that scale well, and keeping the focus on outcomes that matter.

KEY ACHIEVEMENTS

Enhanced Delivery Speed

Increased product delivery speed by 30% through agile practices and reduced handover delays.

Improved Team Retention

Reduced engineering attrition from 18% to under 8% by creating clear career paths.

Optimized Infrastructure Costs

Drove cloud-native adoption, cutting infrastructure costs by 20% and increasing deployment frequency.

Expanded Internationally

Launched products across four countries, contributing to YoY customer adoption growth.

TRAININGS / CERTIFICATES

EXPERIENCE

Software Development Engineer — 2015 - 10/2019

Pitney Bowes — Bielsko-Biała

- **Focus**: Full-cycle software development, enterprise solution delivery, and cross-functional collaboration
- As a core contributor in the engineering team, I worked on complex enterprise applications tailored to multinational clients, including those in regulated and government sectors
- I focused on clean, testable code and collaborated closely with QA, DevOps, and solution engineers to ensure high-quality, timely releases
- Developed complex solutions for multinational companies and the federal government space
- Supported presales teams with technical prototypes that helped secure new enterprise clients
- Collaborated with cross-functional teams to ensure the successful implementation of projects
- Reduced bug rates by 25% through rigorous unit testing and peer code reviews

Software Support Engineer — 2013 - 09/2015

Pitney Bowes — Bielsko-Biała

Test Engineer — 2009 - 09/2013

Pitney Bowes — Bielsko-Biała

EDUCATION

IT Resource management: architectures, processes, standards, quality, Postgraduate Studies — 2022 - 2023

Warsaw University of Technology — Warszawa

- IT Resource management: architectures, processes, standards, quality, Postgraduate

Master of Engineering — 2007 - 2009

The College of Informatics and Management — Bielsko-Biała

- Computer Science, Master of Engineering
